

FEMALE GENITAL COSMETIC SURGERY

EXCEPTIONAL FUNDING REQUIRED

BaNES, Swindon and Wiltshire CCG (BSW) does not normally fund elective vaginal labial surgery, vaginoplasty or hymenorrhaphy.

- Clinicians must ensure there is a clear clinical rationale for any potential intervention, as all procedures that involve partial or total removal of the external female genitalia for non-clinical reasons are defined as Female Genital Mutilation and as such are against the law. (The Female Genital Mutilation Act of 2003)
- Clinicians must be alert to the possibility that some patients who seek revision surgery may do so as a result of previous interventions which are classed as unlawful under the Act.

Background

Labiaplasty

A labiaplasty is a surgical procedure to reduce the size of the labia minora. Labiaplasty is generally a cosmetic procedure to change appearance alone and common consequence of childbirth is not sufficient reason to apply for funding. Labiaplasty is not normally supported or funded by the CCG.

Vaginoplasty

Non-reconstructive vaginoplasty or "vaginal rejuvenation" is used to restore vaginal tone and appearance. As this is generally considered a cosmetic procedure, vaginoplasty is not normally supported or funded by the CCG.

Hymenorrhaphy

Hymenorrhaphy, or hymen reconstruction surgery, is a cosmetic procedure and is not normally supported or funded by the CCG.

This policy does not relate to reversal of female genital mutilation.

This policy is informed by the NHS England (2013) Interim Clinical Commissioning Policy Labiaplasty, Vaginoplasty & Hymenorrhaphy. (Armed Forces Commissioning Policy Task and Finish Group)
